Tools: Git, GitHub, VS Code, Figma, Slack, OOP, AJAX, HTTP, npm, PostgreSQL, Webpack, Node.js, Photoshop, Firebase and Flexbox

APPLICATIONS DEVELOPED

Las Kitchenas [GitHub](#) [Live](#)

A website created with HTML, CSS, and JavaScript used to look up recipes to cook with your significant other

- Organized my code using Object Oriented Programming because I like the way it encapsulates the state of my models
- Made an API call utilizing AJAX to pull recipes that contains specific data
- Created new elements to the HTML using the DOM, such as my favorites list

Bark at the Park [GitHub](#) [Live](#)

Full stack application using React, CSS, HTML, and Google Firebase to create a real-time application for dog lovers to hangout with other dog lovers

- Implemented Firebase Authentication to allow user's to securely sign in with their Google account
- Designed and integrated custom CSS throughout the application such as the Google sign-in, user for, and map markers
- Chose Firebase for OAuth and use of the database which provides real-time communication with the front-end and back-end

EDUCATION

Bachelor of Arts in Human Development

May '18

California State University, Long Beach

Accelerated Web Development Program | LearningFuze

Jun '21

75 hours a week, 975 hours total learning HTML, CSS, JavaScript, NodeJS, and React
